

Dear neighbour:

It's been 11 years since our municipality started with waste separate collection at the doorstep. This system contributed to a significant increase in the recycling rates and the resulting environmental benefits, thanks to the collaboration of everyone. Ajuntament de Búger, together with Mancomunitat des Raiguer, wish to keep on betting on continuous improvement of the separate collection, for this reason they are now starting a Pay-As-You-Throw System for the collection of the residual waste (what is not recyclable) and this new system comes with this information campaign.

We inform you that the **20th April 2017** included will start this new system for the residual waste collection with the **RED BAG**. This means that the residual waste (what is not recyclable) can only be disposed with the authorized RED BAG. It will also be compulsory to dispose the nappies in the authorized WHITE BAGS that can be collected for free in the Ajuntament.

The **RED BAG** is a system that taxes the resident for the excessive RESIDUAL WASTE generated. This type of waste can only be disposed in the Ajuntament authorized bags. The Ajuntament facilitates a certain number of these bags for free to every home address included in the fixed waste tax. Every extra bag needed will have to be acquired in the Ajuntament according to need and this will constitute a variable waste tax.

The **WHITE BAG** is also an authorized bag that the Ajuntament facilitates for free once need justified and registered. The resident can then dispose the nappies and pet excrements (dogs and cats) either at the doorstep the days that the calendar establishes. No other waste can be disposed in this bags.

Attention! In the "parc verd" residual waste and nappies will have to be disposed in the authorized bags.

If you need further information or this one in other languages, please email mediambient@mancomunitatdesraiguer.net or call Ajuntament de Búger 971 51 61 46 or the Mancomunitat des Raiguer 971 87 04 09.

We count on your collaboration to altogether keep improving the separate collection of waste in Búger.

Do you know where everything goes?

ORGANIC MATTER

In the small brown bin

Yes
